*Composite and benchmark performance are for the period July 1, 2012 through December 31, 2012.

** Total firm assets presented prior to 10/1/2016 are those of Alsin Capital Management, Inc.

***Composite and Benchmark data are for the period January 1, 2019 through June 30, 2019

1 – Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire period.

2 - The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The three-year annualized standard deviation is not presented for 2012 through 2014 due to less than 36 months of composite and benchmark data.

Equity Growth Composite: includes portfolios that seek long-term capital appreciation by investing most of its assets in a concentrated portfolio comprised of approximately 4-10 equity securities identified as potentially exhibiting superior and sustainable growth compared with the broad market. There is no limitation or restriction on the industry and market capitalization of investments held or targeted. This strategy is highly concentrated and will have more stock specific risk and potentially lower correlation with the benchmark than a fully diversified strategy. This strategy may also be more volatile than the benchmark or a fully diversified strategy. Put options may be more volatile than the underlying securities they are tied to and may expire worthless. Not every portfolio will have the exact same characteristics. The actual characteristics with respect to any individual portfolio will vary based on a number of factors including but not limited to: (i) the size of the account; (ii) investment restrictions applicable to the account, if any; and (iii) market exigencies at the time of investment. The minimum portfolio size to be included in this composite is \$250,000. The Equity Growth Composite was created October 1, 2016. Leverage is not used. The benchmark for this strategy is the S&P 500 Total Return Index. This index is a market-value weighted index that measures the total return, including price and dividends, of 500 leading companies in leading industries in the U.S. economy. It is not possible to invest directly in this index.

Worm Capital, LLC ("Worm Capital") claims compliance with the Global Investment Performance Standards (GIPS) and has prepared and presented this report in compliance with the GIPS standards. Worm Capital has been independently verified for the periods October 1, 2016 through March 31, 2018.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The Equity Growth Composite has been examined for the periods October 1, 2016 through March 31, 2018. The verification and performance examination reports are available upon request.

The information presented prior to 10/1/2016 occurred while the Portfolio Management Team was affiliated with a prior firm, Alsin Capital Management, Inc. ("Alsin Capital"). Alsin Capital was independently verified for the periods July 1, 2012 through September 30, 2016. While the composite was at the prior firm it received a performance examination. The prior firm track record has been reviewed by an independent accounting firm and conforms to the portability requirements of the GIPS standards.

Worm Capital is a SEC registered independent investment adviser registered in accordance with the Investment Advisers Act of 1940, as amended. Registration does not imply a certain level of skill of training. More information about Worm Capital, including investment strategies and objectives can be found in the firm ADV which is available upon request. A list of composite descriptions is also available upon request.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Withholding taxes may vary according to the investor's domicile. Composite returns represent investors domiciled primarily in the United States. Past performance is not indicative of future results. This is not a recommendation to buy or sell any particular security and you should not assume that any security, sector, or holding discussed are or will be profitable, or that recommendations Worm Capital makes in the future will be profitable or equal the performance herein. Worm Capital reserves the right to modify its current investment strategies and techniques based on changing market dynamics or client needs.

The U.S. Dollar is the currency used to express performance. Returns are presented net of management fees and include the reinvestment of all income. Net of fee performance was calculated using actual management fees from 7/1/2012 through 9/30/2016. Starting 10/1/2016 and through 7/31/2018, net of fee returns were calculated using a model 1.25% management fee that is accrued monthly. Effective 8/1/2018, net returns are from The Worm Capital Fund, LP – Series B on a 1.25% management fee schedule and net of accrued fund expenses. The annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year prior to 1/1/17 and an equal-weighted standard deviation from 1/1/17 onward. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

The investment management fee schedule for the composite is 1.25%.

Long/Short Equity Growth Fund Composite: includes a private fund managed by Worm Capital, LLC, which seeks a positive, above average absolute return over a diverse set of market environments by investing in a concentrated portfolio comprised of long and short equity investments and strategic options positions. There is no limitation or restriction on the industry and market capitalization of investments held or targeted. Long positions are equity investments, or derivatives thereof, identified as potentially exhibiting superior and sustainable growth compared with the broader market. Short positions are equity investments, or derivatives thereof, identified as potentially exhibiting inferior or negative growth prospects compared to the broad market due to specific adverse events, deteriorating fundamentals, and/or momentum considerations, among other potential factors. The goal of short equity positions and long put option positions is to minimize equity market volatility, provide efficient portfolio management along with downside protection, and potentially contribute to additional return generation. The strategy does not have a long or short bias mandate. Gross and net exposures are variable depending on market developments, specific long and short opportunities, and updated macro outlooks, among other potential factors. Put and call options may be more volatile than the underlying security it is tied to and can expire worthless. Leverage is utilized through the shorting of securities, and short sale cash proceeds may be used to purchase additional assets. Portfolios within this composite are highly concentrated and will have more stock specific risk and potentially lower correlation with the benchmark than a fully diversified strategy. This strategy may also be more volatile than the benchmark or a fully diversified strategy. The benchmark is the S&P 500 Total Return Index. This index is a market-value weighted index that measures the total return, including price and dividends, of 500 leading companies in leading industries in the U.S. economy. It is not possible to invest directly in this index. The Equity Growth Composite was created March 1, 2017.

Worm Capital, LLC ("Worm Capital") claims compliance with the Global Investment Performance Standards (GIPS) and has prepared and presented this report in compliance with the GIPS standards. Worm Capital has been independently verified for the periods October 1, 2016 through March 31, 2018.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The Long/Short Equity Growth Fund Composite has been examined for the periods March 1, 2017 through March 31, 2018. The verification and performance examination reports are available upon request.

Worm Capital is a SEC registered independent investment adviser registered in accordance with the Investment Advisers Act of 1940, as amended. Registration does not imply a certain level of skill or training. More information about Worm Capital, including investment strategies and objectives can be found in the firm ADV which is available upon request. A list of composite descriptions is also available upon request.

Results are based on fully discretionary fund managed by Worm Capital. The performance is reflective of what an investor would have received if they invested at the inception of the fund. Composite performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Withholding taxes may vary according to the investor's domicile. Composite returns represent investors domiciled in the United States. Past performance is not indicative of future results. This is not a recommendation to buy or sell any particular security and you should not assume that any security, sector, or holding discussed are or will be profitable, or that recommendations Worm Capital makes in the future will be profitable or equal the performance herein. Worm Capital reserves the right to modify its current investment strategies and techniques based on changing market dynamics or client needs.

The U.S. Dollar is the currency used to express performance. Returns are presented net of all management fees, incentive fees, applicable fund expenses and include the reinvestment of all income. Net of fee performance is calculated by accruing fees and expenses monthly. The annual composite dispersion presented is the standard deviation calculated for the composite the entire year. Policies for valuing the fund, calculating performance, and preparing compliant presentations are available upon request.

The fee schedule for the composite includes a 1.0% management fee in addition to an annual 10% incentive fee subject to a high- water mark. These, in addition to recurring fund expenses like audit and administration fees, are accrued monthly.
